

È data la reale possibilità di errori nella fase di allestimento della cartella di supporto di verificare con l'etichetta. L'effettiva corrispondenza tra gli articoli scelti e l'etichetta che li distingue SICIS non può essere ritenuta responsabile per errori dipendenti dalla non rispondenza tra il campione e la realtà richiesta identificativa. Alla stessa modo data che la colorazione è ritenuta per l'insieme di materie naturali, delle quali alcune alternative instabili. La differenza di tonalità tra il campione e quanto ordinato non può essere oggetto di contestazione. Si precisa pertanto che identificazione, colore, ubicazione, imperfezioni planari e leggere differenze nella spaccatura sono caratteristiche della materia e del processo produttivo.

Given the real possibility of errors in the samplebook assembling, it is suggested to verify with the company - the actual correspondence between the items selected and the label that distinguishes them. SICIS can not be held responsible for errors dependent by the non matching of the sample and its identification tag. Similarly, since the color is produced by the melting of natural materials - some of them highly variable - the difference in tone between the sample and what ordered can not be considered. It is also understood that shade variations, small chipping, planar imperfections and slight difference in thickness are characteristics of the product and of the production process.

Compte tenu de la réelle possibilité d'erreurs lors de la préparation de l'album nous suggérons à nos clients de vérifier la correspondance entre les articles choisis et l'étiquette qui les identifie. SICIS ne peut être tenue responsable pour des erreurs dépendantes de la non correspondance entre l'échantillon et la réalité requise d'identification. De la même manière compte tenu que la coloration est obtenue par la fusion de matières naturelles - dont certaines sont très instables - la différence de tonalité entre un échantillon et ce qui est commandé ne peut être l'objet de contestation. Nous précisons donc que le marquage, position, épaisseur, des imperfections de planimétrie et légères différences d'épaisseur sont des caractéristiques de la matière et du processus de fabrication.

Angelsicht der Möglichkeit von Fehlern bei dem Aufbau der Mustermappe, wird empfohlen, diese mit dem Lieferanten - auf die tatsächliche Übereinstimmung der angeordneten Artikel und der Identifikationskarte, zu überprüfen. SICIS kann nicht für Fehler haftbar gemacht werden, die auf Nichtübereinstimmung zwischen dem Muster und dem entsprechenden Identifikationskarte resultieren. Auf die gleiche Weise, da die Farbgebung durch die Schmelze von natürlichen Materialien erfolgt, sind gewisse Farbunterschiede zwischen dem Muster und bestelltem Material, die der Natur des Materials und der Instabilität von natürlichen Materialien folgen, nicht Gegenstand der Kontestation. Es wird ausdrücklich darauf hingewiesen, dass die Kennzeichnung, die Position, die Dicke und die planimetrischen Abweichungen sowie geringfügige Unterschiede in der Stärke, die Eigenschaften des Materials und der industriellen Aufbereitung sind.

Devido à real possibilidade de erros na preparação da cartela, sugerimos que se verifique cuidadosamente com o fabrico a real correspondência entre os artigos e as etiquetas. SICIS não se assume a responsabilidade por erros decorrentes da não correspondência entre as amostras e a realidade requerida de identificação. Da mesma forma, uma vez que a coloração é obtida através da fusão de matérias-primas naturais, algumas das quais são alternativas instáveis, a diferença de tonalidade entre o amostra e o produto a ser encomendado não pode ser objeto de contestação. Ressaltamos, portanto, que a identificação, o posicionamento, a espessura, as imperfeições planares e as pequenas diferenças na espessura são características da matéria e da parte do processo de produção.

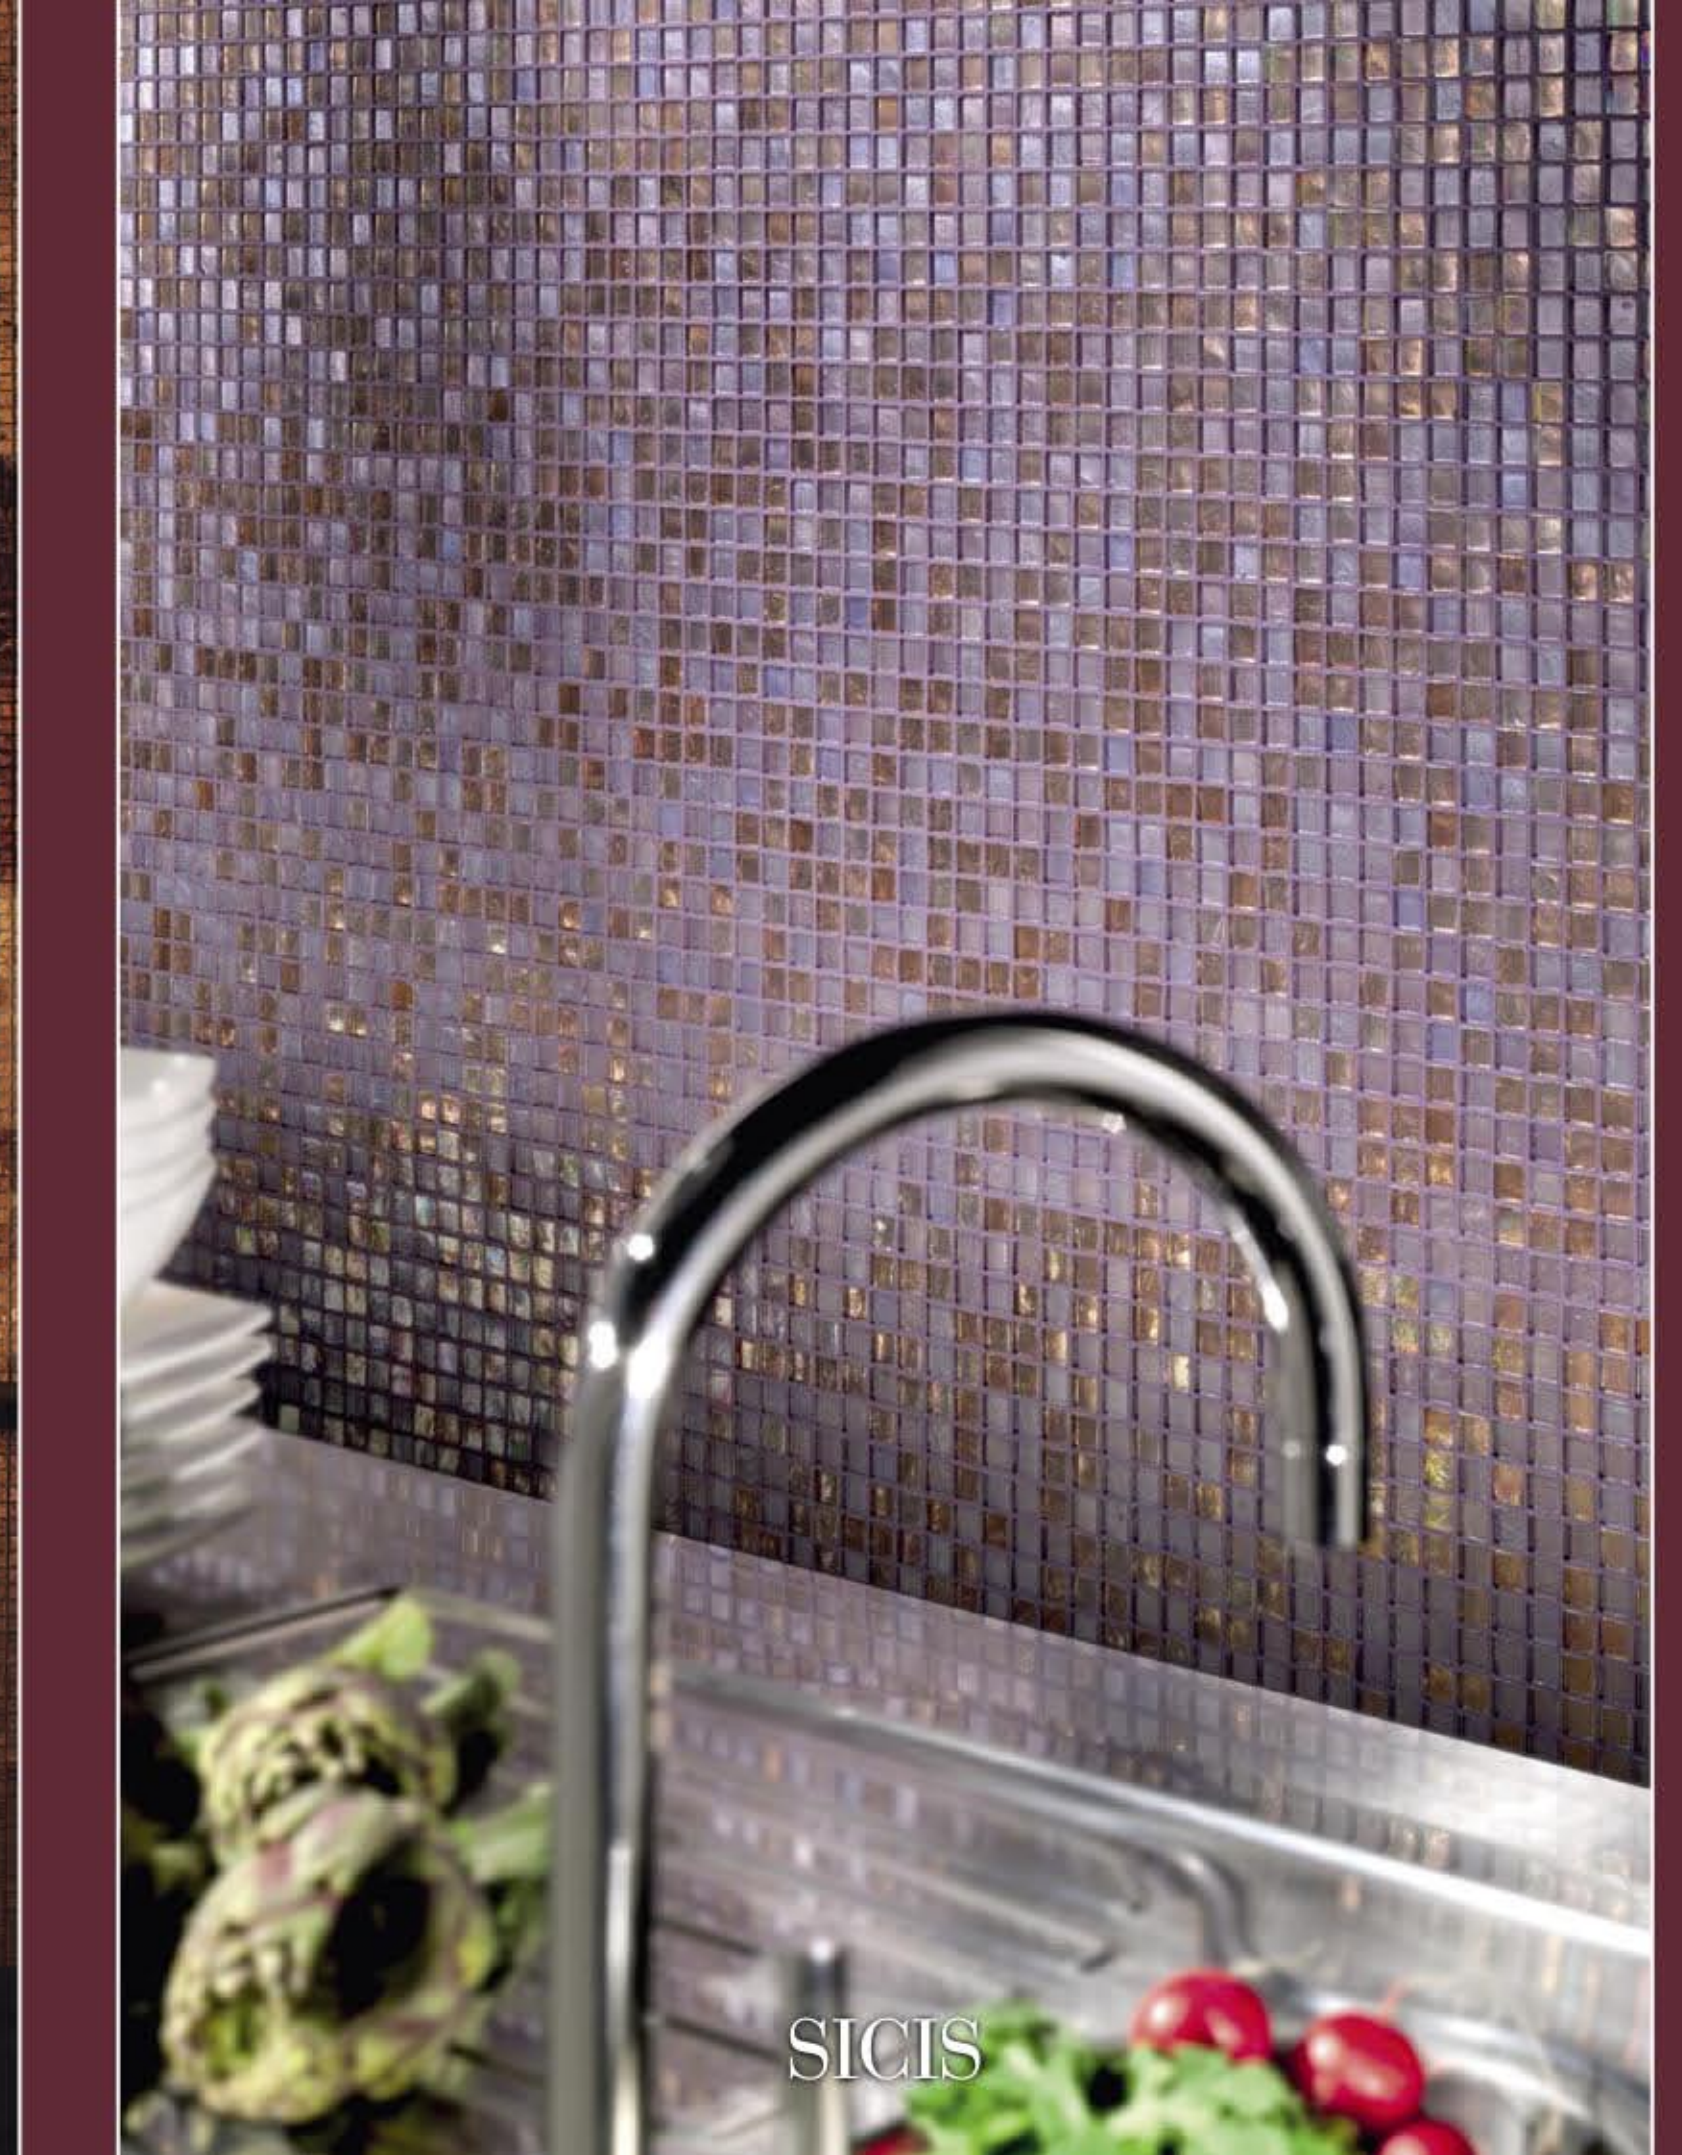

Поскольку есть реальная возможность ошибок при подготовке каталога, рекомендуется уточнить у поставщика соответствие выбранных изделий сопроводительным этикеткам. Фирма SICIS не отвечает за ошибки, вызванные несоответствием между образцами и реальностью требуемой идентификации. Кроме того, поскольку цвет получается путем сплавления природных материалов, некоторые из которых являются альтернативными, различия в оттенках между образцами и заказанной продукцией. Поскольку тон цвета и его стабильность зависят от особенностей сырья, различия в оттенках и небольшие отклонения в толщине являются характеристиками материала и технологического процесса производства.

A sostegno dell'impegno di SICIS verso l'ambiente, i prodotti SICIS vengono sottoposti a prove che confermano le caratteristiche ecologiche e il loro relativo contributo alle certificazioni quali LEED, Green Communities e Green Globes.

La sapiente applicazione del mosaico sostiene il design concept di BIOPHILIA.

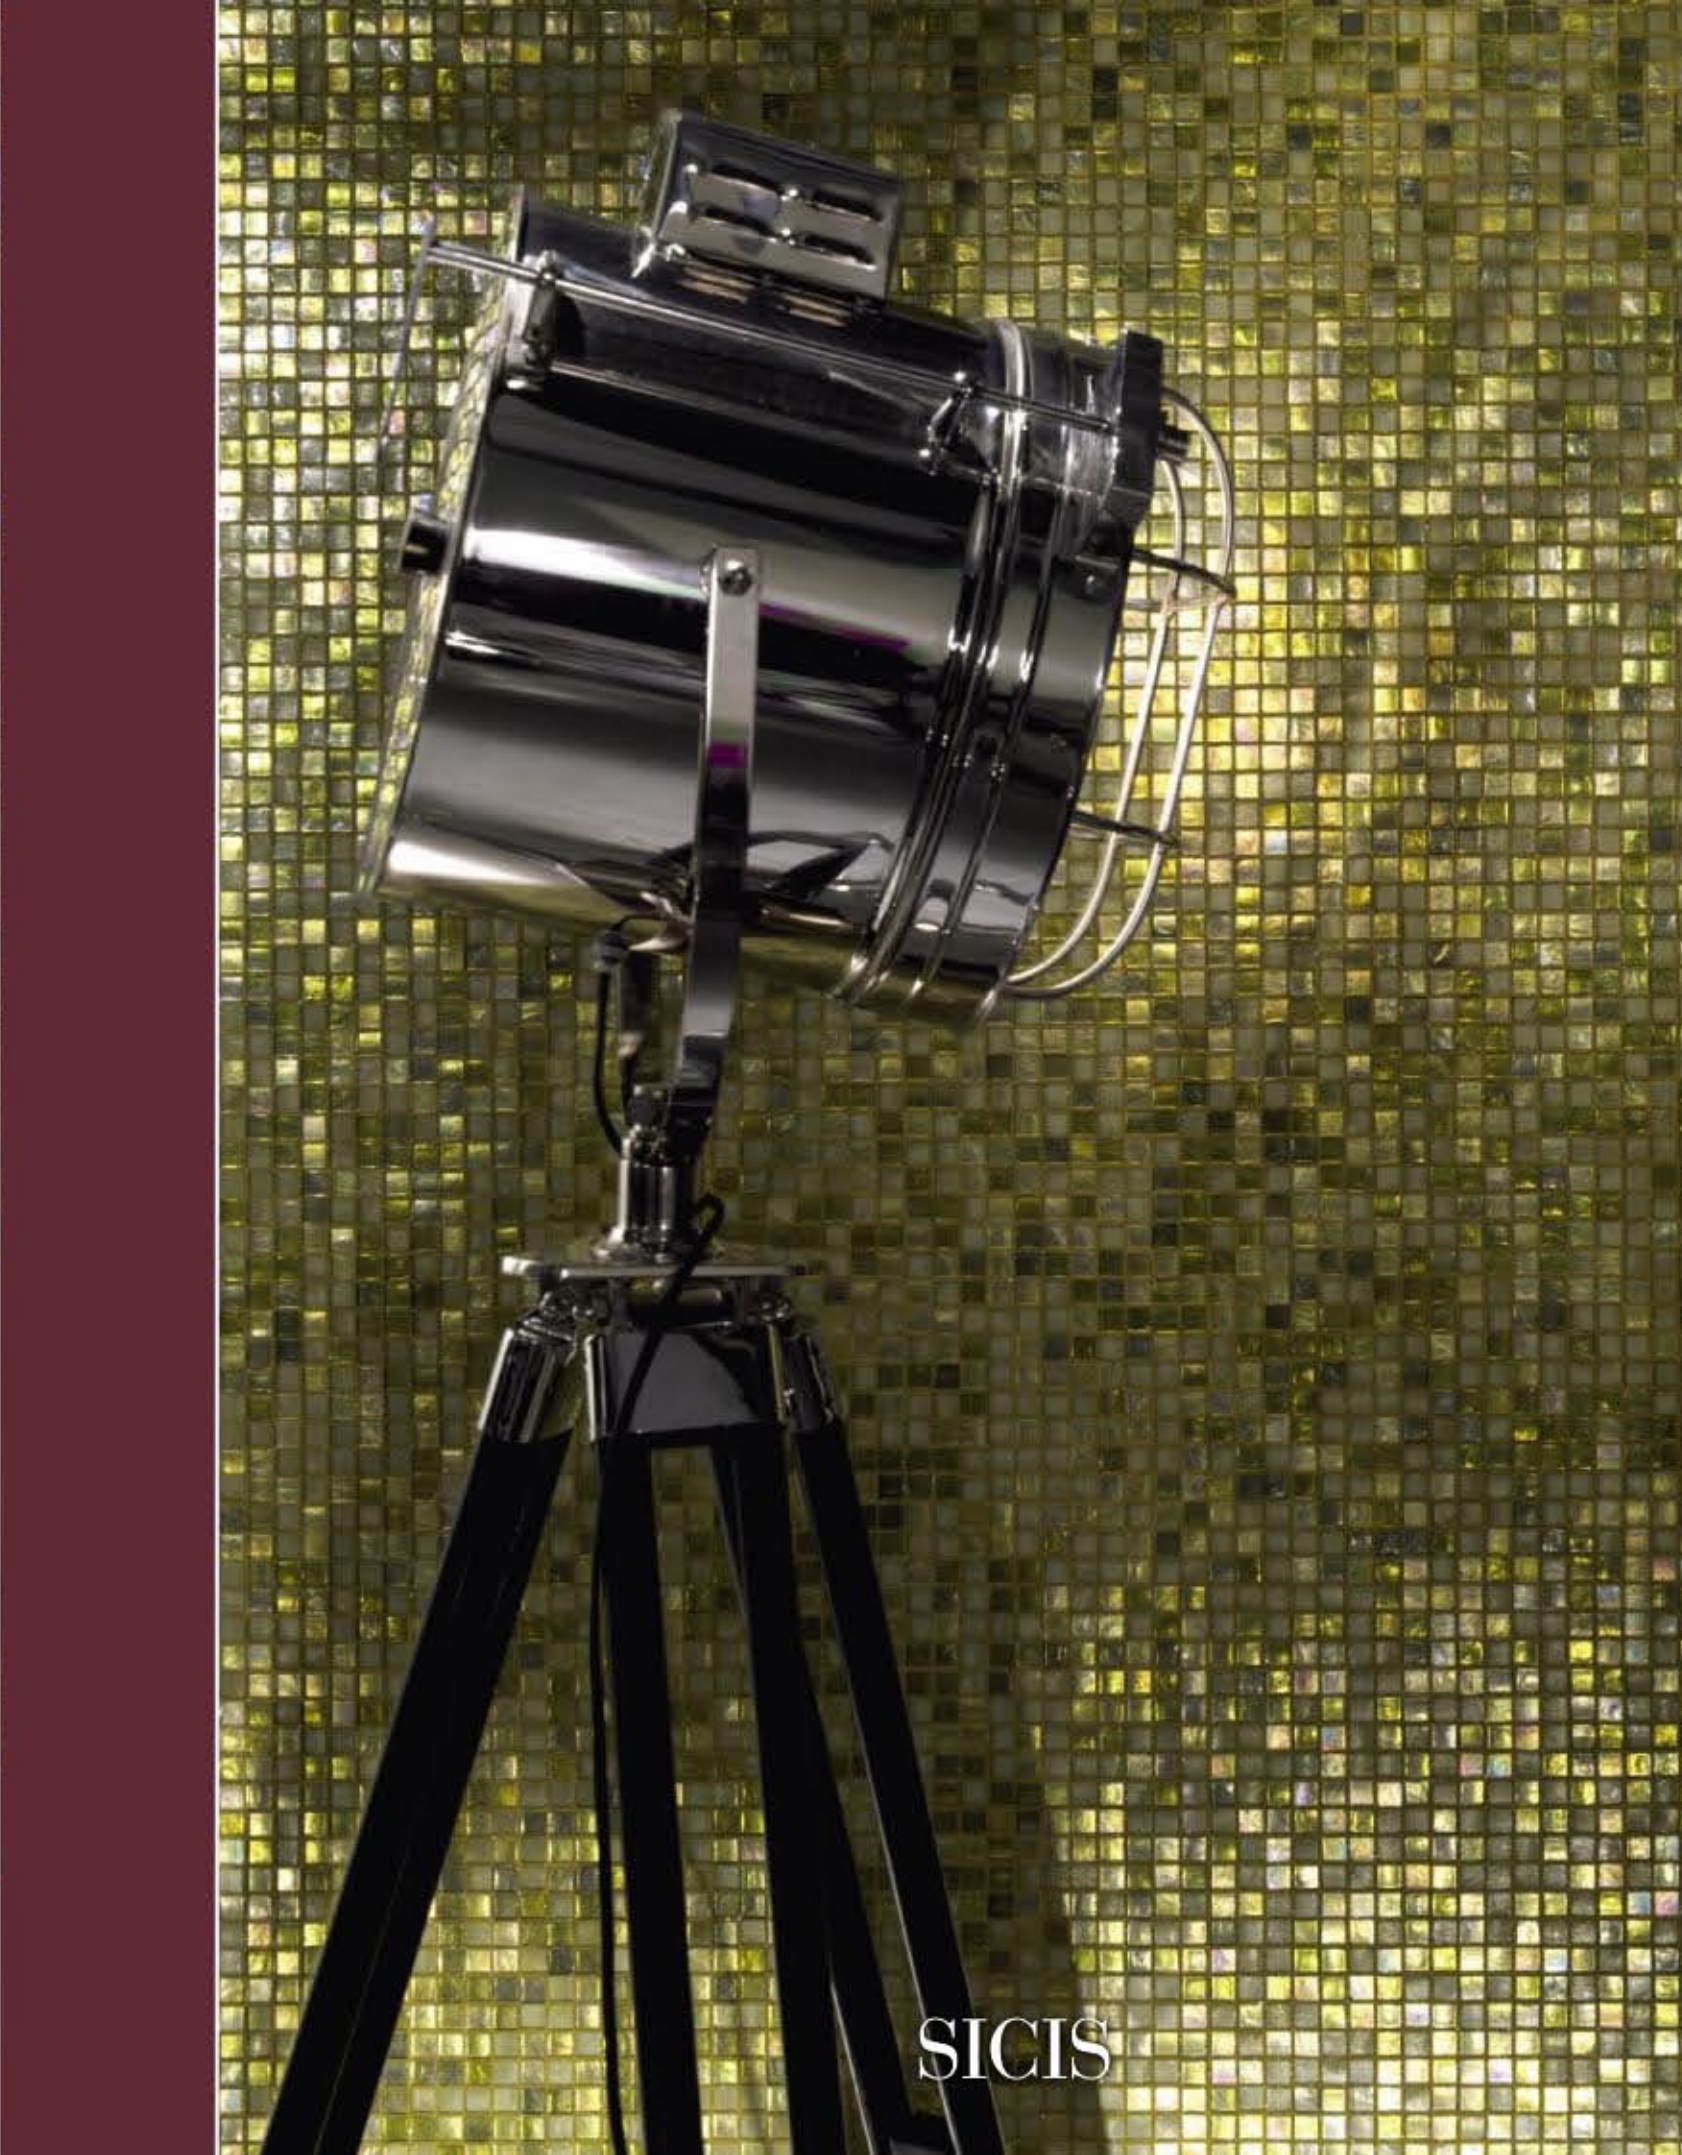

In support of SICIS's commitment to environmental performance, SICIS products have undergone testing to confirm green attributes and their associated contribution to certifications including LEED, Green Communities and Green Globes. The careful application of mosaic finishes can support the design concept of BIOPHILIA.
