# Water wellbeing in its earliest form

Hydrotherapy involves the use of water for soothing an aching body or speeding the recovery of muscular ailments. The first person to understand the potential of water was the Greek philosopher Thales who saw water as a primordial element, origin of all things. The first people to put into practice the benefits that water could bring to body and mind were the Romans, who introduced bathing as a refined daily habit. Numerous thermal spas were built, enhanced by marble and mosaics. The Middle Ages was a dark period when the use of water for enhancing well being was considered sinful but between 1700 and 1800 many hydrotherapy stations flourished again. Water became synonymous with health and the most diverse practices were designed to deliver various targeted benefits, from Thalassotherapy based on sea salt, to alternating hot and cold water. It was at the end of the 19th Century that the quantum leap was made in Germany with the industrial production of cast iron bath tubs after which followed the evolution that led to baths with integrated hydrotherapy systems patented by Jacuzzi.

# When the Jacuzzi® brand became a household name

Our world renowned brand encompasses years of cutting edge design and technology and since 1956, the name has established itself as both innovator and inventor. The Jacuzzi® story is a warming tale of sheer determination and hard work. Such focus, dedication and drive were fundamentally cultivated with family at the heart. With 7 brothers, 6 sisters, 2 world wars and emigration, the founding Jacuzzi family spent their lifetime exploring new ideas and experimenting with product designs to build a business.

The seven Jacuzzi brothers emigrated to California from Italy. The brothers made great strides in aviation by inventing and flying the first enclosed cabin monoplane. In the 1920's their engineering skill and interest in hydraulics and the thermodynamics of fluids led them from the field of aviation to agriculture. Incorporating their hydraulic insight, the Jacuzzi family later made notable advancements in the agricultural pump industry

In 1943 Kenneth Jacuzzi developed rheumatic fever, which left him with juvenile rheumatoid arthritis. Recognising that monthly hydrotherapy sessions at hospital eased his son's symptoms, lead Candido Jacuzzi, the youngest of the 7 brothers, to develop a new hydrotherapy pump in 1956, that would give Kenneth more regular treatment at home. From that application, a small niche business developed. The family sold their portable pump, named J-300®, to hospitals and schools. The pump was later designed alongside the bath and new exclusive jet technology took the pump idea to a new level. A mix of 50% air and 50% water, turning through these special jets provided an experience like never before.

By the 1970's, Candido's grandson Roy Jacuzzi developed larger bathing units with built-in heating and filtration systems were introduced to accommodate groups of bathers, thus creating the first hot tub.

Today the engineering and technological advancements in hydrotherapy and jetted baths continue to flourish as new additions and ideas appear on Jacuzzi® whirlpool baths and hot tubs. We continue to anticipate your needs effectively by carrying on the Jacuzzi® tradition of style and ingenuity. In addition to being recognised as the world's largest selling brand of jetted whirlpool baths and hot tubs, Jacuzzi has over 250 worldwide patents for advancements in pump systems, jet technology, air control and product design.

Jacuzzi® brand.  
More than just a name.

Over 50 years of invention and innovation have taught us to always keep moving. We continuously work towards uncovering the next technological discovery that will enhance the sensory experience of a Jacuzzi® hot tub. You know you're always getting the best hydromassage possible.

# The foundation of your Jacuzzi® experience

**design:** beautiful flowing design makes a distinctive style statement.

**health:** relaxing, refreshing and re-energizing supports a healthy lifestyle.

**pleasure:** pleasure is freedom to enjoy your time in any way you wish.

**performance:** continuous technical innovation and performance that ensure a positive experience.

A true brand experience extends beyond the use of a product. Your Jacuzzi® hot tub is not only a great place to relax and recharge every day, but its place in your busy lifestyle ensures consistent delivery of a massage experience and a revitalising journey that will inspire and transform your life.

To achieve this consistent experience, Jacuzzi prides itself on a cohesive design and product development journey that integrates our 4 brand values in every product. We define ourselves, our products and our standards by these values.

# Your Jacuzzi® hot tub

Hot tubs are available in all shapes and sizes. It's important to choose one that will best suit your needs. It is important to think about how much space you have in your garden – and the access to it. This may limit the hot tub size you can accommodate. If you are planning regular hot tub parties, then you might need more seats than a standard family size. Although a larger hot tub may not always mean more seats, they are generally more comfortable with more space to move around in. Jacuzzi® hot tubs are available in many different sizes, colours and styles. Take your pick and enjoy your hydromassage.

#### **Personal space and wellbeing?**

If you crave some space and a personal retreat at the end of the day, a Jacuzzi® hot tub is just what you need. With a different massage in every seat, play your favourite relaxing music and pamper yourself from head to toe.

#### **Socialising with friends?**

You'll be the envy of all your friends and neighbours with a Jacuzzi® hot tub. Apart from the great hydromassage, the larger hot tubs are spacious, fun and an exceptional talking point for you and your friends. Add a little luxury to your garden and throw the best party!

#### **Fun for your family?**

Spending quality time together is one of the biggest benefits of owning your Jacuzzi® hot tub. Playing games or chatting to loved ones in the garden, away from the pressures of every day, really helps you appreciate the finer things in life.

# Hydrotherapy

## The effects of hydrotherapy

Hydrotherapy involves the use of water for soothing an aching body or speeding the recovery of other muscular ailments. It combines water with air and heat to promote wellbeing. Water makes us buoyant, reducing our body weight by 90%. This, together with warmth, greatly eases stress on the body's muscles and joints.

## How it works

In warm water, the heat dilates our blood vessels improving blood to flow to sore or damaged tissue. Our muscles relax, our circulation improves and the weightlessness helps us lose the tension we've unconsciously been carrying around all day. Warm water is used in physiotherapy to speed recovery from injuries and relieve muscle soreness. From a targeted stream for deep tissue massage to relaxing micro bubbles, Jacuzzi PowerPro® jets give you a variety of hydrotherapeutic massage types that improve circulation and promote the flow of endorphins.

A great hot tub massage includes hot tub jets that are the right size for a specific muscle group with the appropriate intensity. All Jacuzzi PowerPro® jets are made to direct water flow. You can customise a massage by controlling the flow. Divert water flow pressure from one seat to the next and turn the hot tub jets off and on individually to personalise your massage. A rotating stream of water and air replicates a hand circling or rubbing certain areas of your back for a smooth massage.

### **Who can benefit**

Massage alone is proven to reduce stress, calm anxiety, enhance sleep quality and improve concentration; as well as aiding in other physiotherapy and recovery programmes. Hydrotherapy massage is not an alternative for medical massage treatments, but it is easily carried out at home and can be used to support a healthy active lifestyle. Warm water therapy in a Jacuzzi® hot tub works for people of all shapes, sizes and stress levels. Some people need a pulsating, strong jet stream for working knots out of large muscles. Others crave a soothing warm water retreat that clears the mind as it relaxes the body. The benefits of hydrotherapy could go even further as it is thought to help ease symptoms of arthritis whilst also providing temporary relief from chronic pain and promoting better sleep.

# Jacuzzi® PowerPro® Jets

## PowerPro® MX Jets

This is the original Jacuzzi® jet, perfected. Virtually every jet manufactured today is based on this unique and innovative design. Our PowerPro® MX Jets deliver the maximum volume of water per minute - more than any other jet available today. The big, bold massage action of the MX Jet feels comforting as it works deeply to soothe tired and sore muscles.

### Stimulates:

- 1 Neck area
- 2 Shoulders and back
- 3 Lower back
- 4 Hips
- 5 Hands and wrists
- 6 Legs
- 7 Feet

## PowerPro® MX2 Jets

Based on the form and function of the original Jacuzzi jet created 50 years ago, the new generation, patented, MX2 jets deliver maximum volume at a higher air-to-water ratio. PowerPro® MX2 jets are strategically located to deliver a bold massage, especially effective for muscles in the lower back.

### Stimulates:

- 1 Neck area
- 2 Shoulders and back
- 3 Lower back
- 4 Hips
- 5 Hands and wrists
- 6 Legs
- 7 Feet

## PowerPro® FX jets

Jacuzzi® PowerPro® FX jets' unique spiral action sends an energetic stream of air and water that's perfect for smaller muscle groups. Adjustable to high and low pressure, FX jets relieve tension at pressure points in the shoulders, neck, back, calves and feet.

### Stimulates:

- 1 Neck area
- 2 Shoulders and back
- 3 Lower back
- 4 Hips
- 5 Hands and wrists
- 6 Legs
- 7 Feet

## PowerPro® FX Small Jets

Based on the FX technology, the FX Small Jets are perfect for a focused massage on key pressure point areas, such as your feet. The jets are adjustable, making it easy for a perfect foot massage.

### Stimulates:

- 1 Neck area
- 2 Shoulders and back
- 3 Lower back
- 4 Hips
- 5 Hands and wrists
- 6 Legs
- 7 Feet

### PowerPro® RX Jets

The spinning action of the patent-pending PowerPro® RX jet is fully adjustable. Simply turn the dial on the face to customise the pressure or turn off the jet action entirely. Modest in size, the RX jet covers a sizable area, reaching the key muscles and nerves of the back for a pampering massage.

#### Stimulates:

- 1 Neck area
- 2 **Shoulders and back**
- 3 Lower back
- 4 Hips
- 5 Hands and wrists
- 6 Legs
- 7 Feet

### PowerPro® IX Jets

This illuminating jet creates a dramatic impact. Maximum airflow is combined with high-output LED lighting to create a unique, champagne bubble effect as the effervescent light is carried by the bubbles to the water's surface.

#### Stimulates:

- 1 Neck area
- 2 **Shoulders and back**
- 3 Lower back
- 4 Hips
- 5 Hands and wrists
- 6 Legs
- 7 **Feet**

### PowerPro® NX2 Jets

Advanced NX2 jets effectively relieve tension and strain in the sensitive (and hard to reach) neck area with a highly focused stream of water. Change direction by adjusting the nozzle and intensity of the massage by turning the jet face.

#### Stimulates:

- 1 **Neck area**
- 2 Shoulders and back
- 3 Lower back
- 4 Hips
- 5 Hands and wrists
- 6 Legs
- 7 Feet

### PowerPro® PX Jets

The PX jets provide a gentle pulsating massage that can be adjusted in strength to suit your needs. It is perfect for smaller muscle groups including the wrists and hands.

#### Stimulates:

- 1 Neck area
- 2 **Shoulders and back**
- 3 Lower back
- 4 Hips
- 5 **Hands and wrists**
- 6 **Legs**
- 7 Feet

### PowerPro® FX Rotational

Using the same FX technology, the new PowerPro® FX rotational jet focuses on smaller muscle groups with a kneading effect to stimulate surrounding tissue.

#### Stimulates:

- 1 Neck area
- 2 **Shoulders and back**
- 3 **Lower back**
- 4 Hips
- 5 Hands and wrists
- 6 **Legs**
- 7 **Feet**

### PowerPro® FX Large Rotational Jets

The FX Large Rotational Jet has a wide swath that provides an exceptional massage for large muscles. A stainless steel centre shaft ensures non-corrosive and long term performance.

#### Stimulates:

- 1 Neck area
- 2 **Shoulders and back**
- 3 Lower back
- 4 Hips
- 5 Hands and wrists
- 6 **Legs**
- 7 **Feet**

### PowerPro® FX Large

The PowerPro® FX Large jets focuses on the middle of the back relieving tension and muscle strain, typically caused by poor posture. The FX Large jet gives a spiral action massage to the back promotion better circulation.

#### Stimulates:

- 1 Neck area
- 2 Shoulders and back
- 3 **Lower back**
- 4 Hips
- 5 Hands and wrists
- 6 **Legs**
- 7 **Feet**

### PowerPro® BX Jets

Often used in Jacuzzi® lounger seats, these unique jets offer a very high ratio of air to water for a softer, soothing effect across your calves.

#### Stimulates:

- 1 Neck area
- 2 **Shoulders and back**
- 3 Lower back
- 4 **Hips**
- 5 **Hands and wrists**
- 6 **Legs**
- 7 **Feet**

# The path to wellness

The seats in a Jacuzzi® hot tub are designed to offer a wellness program, which ensures delivery of an effective all over massage. Detailed below are the massage effects at each stage of the wellness path:

1°  
Dive in and enjoy a moment's rest in the entrance, letting your legs sink further into the soothing warm water. You can choose to enjoy the pleasure of aromatherapy. The relaxing trickling of the waterfall in the background will help you escape the rush of everyday life. Activate the circulation pump and begin relieving the lower joints.

2°  
Now sit completely in the tub. The first session, counterclockwise, gently massages your back, focusing on the shoulders and lumbar areas. Your blood circulation is stimulated, muscles and joints loosen as the level of stress and tension is released from your body.

3°  
The next corner is a favourite. Here, the massage becomes more energetic, the jets are stronger and larger, able to effectively improve muscle tone. The jets' action rotates water flow, which improves circulation and the look of your skin.

4°  
Feel the full power of the circulation pump as you sit in the corner of your hot tub opposite the entrance. Enjoy a vigorous massage that spreads across the whole of your back, losing stiffness and relaxing the muscles.

5°  
As the wellness path reaches its peak, your muscles are unwinding and the massages start to get softer. Your stress is diminishing and your body is feeling more refreshed and stimulated.

6°  
Finally, the therapy lounge seat. In this position feel the combination of relaxing back jets with 2 rows of smaller jets that deliver a delicate massage up and down your hamstrings and calves like fingers. The jets in the footwell also invigorate your feet and ankles.

7°  
Now, with the massage jets turned off, take a moment to enjoy the peaceful warmth of the water and feel the tingly effects of your hydrotherapy massage. Fold your shoulders into the watery blanket one last time and submerge yourself in comfort.

# ClearRay™

innovative peace of mind

Without CLEARRAY™

With CLEARRAY™

The ClearRay™ system, standard on all Jacuzzi® hot tubs represents an evolution in water treatment. UV light has been used for years as a reliable water disinfectant. The light effectively interacts with the DNA of bacteria and viruses, destroying their ability to reproduce. It is a natural process that adds no by-product to your water. Simply designed with a long lasting, low pressure UV-C lamp and integrated in the hot tub filtration process, ClearRay treats 99.9% of waterborne pathogens. Sanitising begins in seconds, giving you crystal clear water instantly.

# 10 reasons to choose a Jacuzzi® hot tub

## **1. Spend more time with your family.**

Spending quality time together as a family or a couple is one of the biggest benefits to having a Jacuzzi® hot tub in your life. Playing games or chatting to loved ones in your garden, away from the pressures of every day, really helps you appreciate the little things in life that truly matter.

## **2. Unwind after a full day**

There's nothing more comfortable or soothing after a busy day than sinking into a warm bath of bubbly water. All your muscles relax into the warmth and our exclusive Jacuzzi® jets of water and air gently target your aching joints with a comforting massage. Help your body and mind relax properly at the end of the day.

## **3. Recharge and boost your energy**

A regular full body massage promotes better circulation by increasing blood flow around your body. Hydrotherapy massage from a Jacuzzi® hot tub is flexible, so you can control the direction and amount of pressure, making your massage as soothing or as penetrable as you need. A healthy body is an energetic, active one and a Jacuzzi® hot tub can really support your healthy lifestyle.

#### **4. Increase your energy, not your energy bills.**

Running a hot tub can be expensive if it isn't insulated enough to maintain heat. Jacuzzi® hot tubs use innovative, latest technology and components to keep our tubs insulated better than most on the market. Jacuzzi® hot tubs boast up to four different layers of insulation. This keeps heat in more effectively and reduces running costs significantly.

#### **5. Keep your water cleaner for longer**

Hot tub water must be kept clean and safe for use. Water should circulate throughout the day to avoid it becoming stagnant. All Jacuzzi® hot tubs have programmable circulation and filtration cycles. As it circulates, the water in a Jacuzzi® hot tub is also cleaned as it passes through our ClearRay™ UV technology as well as our filtration systems. We'll save you time and effort on maintaining your Jacuzzi® hot tub by keeping it moving and filtered while it is out of use – this doesn't add to your running costs either.

#### **6. Your Jacuzzi® hot tub will last for years!**

Look inside a Jacuzzi hot tub and it is like looking under the bonnet of a luxury car. We believe in providing you the best hot tub experience and do not compromise on quality by using cheaper parts. We know you will enjoy your Jacuzzi® hot tub for years to come and we want you to have total faith in its ability. Our high standards and keen attention to detail means that we've done the hard work for you, you can relax.

#### **7. We're here for you**

Our priority is making sure your Jacuzzi® hot tub experience is better than you expect. From your first visit to one of our retailers' showrooms, through doing your research, choosing your favourite Jacuzzi® hot tub, getting it installed and even 10 or 20 years later, we want you to be proud of choosing the best: Jacuzzi®. We offer a manufacturer's guarantee for all our hot tubs for your peace of mind. A Jacuzzi® hot tub will help your life flow smoother, and so will our back up service.

#### **8. We have over 50 years experience**

The Jacuzzi family have been making hot tubs since the 1960's – in fact they designed and launched the first one! Since then, our technicians have designed and patented hundreds of new ideas and technologies. We know about hot tubs. We love hydrotherapy. We listen to our customers and use their valuable feedback to keep on building new features and better designs.

#### **9. You already know our brand**

Jacuzzi® is a brand name. Finding out that we're actually a family brand is good news. You already know which brand to trust. Whenever you want to learn more about hot tubs, hydrotherapy or investing more time into your own or your family's well being, you know who to turn to first.

#### **10. We work with associations.**

Being the market leader in hydrotherapy products, we stay close to our industry associations. We provide them with our experience and support in creating a stable foundation for selling hot tubs.

# Respect for the environment

The essence of our brand strength lies with our integrity. We do our utmost to bring an excellent service to all of our customers. We take responsibility for our actions along the way. For example;

- All wood used in our hot tub comes from suppliers supporting environmental management systems.
- Backing materials on our cabinets are made from at least 80% recycled plastics.
- LEDs in our hot tubs use approximately 8% of the energy used by a comparable incandescent bulb.
- Our SmartSeal™ insulation system is made from recycled blue jeans.
- Jacuzzi® J-LXL is made with 1.5" of high density, heat-retaining backing as well as our standard insulation materials, making it the most energy efficient hot tub in its class.

- The Jacuzzi® hot tub factory is a leading modern facility, utilising a Thermal Regenerative Oxidiser during production; a greener practice that neutralises 99% of off-gasses that might ordinarily be released into the environment.
- We have built a closed loop system to recycle virtually all the water we use for testing our hot tubs.
- Excess acrylic from our hot tub shells is ground down and recycled for other products such as industrial cleaning agents.
- Our electronics do not contain lead and are non-toxic. This allows for safe disposal at the end of their lifecycle.

# Understanding your Jacuzzi® hot tub

## **Where should I place my hot tub?**

Not only is a Jacuzzi® hot tub great for your lifestyle, it also looks fantastic as a garden feature. There are a couple of considerations to be aware of before you plan a hot tub in your garden design. For example, have you left enough space around it for steps, covers and other hot tub accessories? Have you left sufficient access for upgrades or repairs to the elements inside your hot tub? What will your hot tub sit on?

The base needs to be set on a level foundation, not straight onto grass. If your hot tub is going indoors don't forget that you need sufficient ventilation too.

## **Who does the installation?**

When you purchase a Jacuzzi® hot tub, our main priority is getting you to sit back and relax in your new hot tub at home. We'll help you decide where to put it, work out how to get it there, deliver it and install it for you. We'll get everything set up and running so you can jump straight in. Our team will even show you how to use your new hot tub and explain about keeping the water clean and safe.

## **How often will I need to replace the water?**

A hot tub needs to be drained and re-filled up to 4 times a year. If it is well looked after and the water chemistry is managed effectively, the need to drain and refill is less frequent.

### **Can you use the spa in winter?**

Yes, Jacuzzi® hot tubs are extremely well insulated and the water temperature is maintained throughout the year. Many customers tell us that the Jacuzzi hot tub experience is better in the colder weather.

### **Are the running costs of a Jacuzzi® hot tub expensive?**

Jacuzzi® hot tubs remain connected to the mains, keeping water warm all year. But don't worry, high quality Jacuzzi® hot tubs have several features that keep running costs to a minimum. These include our unique Trifusion™ acrylic shell, 2 layers of insulating foam plus our new SmartSeal™ wrap on some models. Our J-LXL model is most efficient hot tub in its class, with high density insulation tucked in around all sides and the base. We've included kW ratings for all our hot tubs so you can work out running costs based on the cost of energy in your area.

### **Is a Jacuzzi® hot tub difficult to maintain?**

Maintaining a Jacuzzi® hot tub is easy. Depending on your use, your hot tub will need refilling and cleaning 3-4 times a year. On top of that, your filters will need cleaning regularly and your hot tub water will need treating every day with a small amount of chemicals.

### **How do you operate the different functions?**

All Jacuzzi® hot tub features are managed from an integrated control panel that is conveniently placed and easy to use. The control panel helps you manage the temperature, the lighting, the waterfall and your music system. Some Jacuzzi® hot tubs include a floating remote control.

### **Does a Jacuzzi® hot tub have a warranty?**

Yes, every Jacuzzi® hot tub has at least a standard 2 year warranty included.

# flow city spa

italian design

## **City™ Spa, the urban dimension of wellness**

Inspired by the rules of space-saving, Jacuzzi® has created City™ Spa. Ideal for urban contexts, it features compact, extremely geometric aesthetic lines and its internal ergonomics are enhanced to the point of **offering two lounge seats within a space of just 2.4 m<sup>2</sup>**. In addition, thanks **to its limited floor load**, it is the first hot tub that can be installed in penthouses and on terraces. Designed to transform the home bathroom into a beauty spa, it prestigiously enhances the wellness area of even smaller gyms, hotels, gardens and shared spaces.

## **Flow, the most prestigious design shows off Jacuzzi® wellness**

Flow is the cutting-edge hot tub that revolutionises the way of perceiving wellness. Inspired by City™ Spa and created from our collaboration with the top designer Daniel Libeskind, it is a perfect synthesis of design and functionality, elegance and technology. Its iconic, futuristic forms which open upwards like a vortex are inspired by the spas of the classical world, making it the exceptional star of prestigious urban installations, such as penthouses, terraces, patios and large bathrooms.

### Simple and intuitive commands

The LED digital control panel on the top edge of the hot tub is a jewel of technology and design. With a simple touch of your finger, you can activate and select all the hot tub functions simply and intuitively. It thus acts as a fully-fledged wellness unit.

### Say farewell to impurities

The filtering system is equipped with a skimmer to remove impurities present on the surface of the water. The ClearRay™ system with UV technology keeps the water 99% pure for much longer, thereby restricting the use of chemical products.

### Winter Pro Kit

Our new Winter Pro kit allows you to use your hot tub during winter or in the colder weather with sensible energy savings. Based on the tests executed according to CEC standards (California Energy Commission), the energy necessary to keep water at the temperature of 39° c decreases impressively.

### Perfect and constant temperature

Thanks to the electric heater, the water can be brought to the desired temperature by way of 2 programming modes that offer steady heat when required and fuel economy.

# delfi delos santorini pro unique alimia

italian design

## **The signature on hot tub design**

The clean, contemporary lines of each hot tub design depict the fusion of functional hydrotherapy with European elegance.

## **Control at the touch of a button**

The user friendly LCD or LED control panels are designed to be clear and simple. With intuitive menus, they offer immediate control to enable, disable, and adjust every aspect of the tub.

### Winter Pro Kit

Our new Winter Pro kit allows you to use your hot tub during winter or in the colder weather with sensible energy savings. Based on the tests executed according to CEC standards (California Energy Commission), the energy necessary to keep water at the temperature of 39 °C decreases impressively.

### The perfect temperature

Keep your water temperature as you like it. With 2 programmable settings, you can maintain a consistent temperature or use an eco mode.

### The rhythm of hydrotherapy

These hot tubs feature an MP3 player and Bluetooth facility, to enhance your moments of relaxation with your favorite music.

### Keep water clear for longer

Some models feature a water skimmer that removes the larger particles from the water surface. Our ClearRay™ system with UV technology also treats 99.9% of water, so you need fewer chemicals to maintain it for longer.

### **The sound and smell of your hot tub**

The hot tub conceals a holder for aromatherapy beads, letting you relax in the aroma of your choice. The 4 speaker audio system is also concealed with a cross-over filter and subwoofer. The system included a stereo radio and CD player, with MP3 jack with a remote control.

### **Stay in control**

The user friendly LCD control panel is the only thing you can see. The intuitive interface lets you manage your hydromassage through the pumps, aromatherapy, lighting, and audio system.

### Water has no boundaries

This innovative hot tub allows you to experience the luxurious deep immersion and beauty of a commercial infinity pool in your own garden. This is the first domestic hot tub in the world that features an overflow grid and integrated compensation tank. Hidden audio system and controls contribute to the seamless surface and contemporary look.

### Keep water instantly clear

The Instant Clear function allows you to boost the filtration system whenever you need it to work harder at filtering the water. This is especially useful in situations such as before or after a party with friends. Our ClearRay™ system with UV technology also treats 99.9% of water in the tub, so you need fewer chemicals to maintain it for longer.

### Winter Pro Kit

Our new Winter Pro kit allows you to use your hot tub during winter or in the colder weather with sensible energy savings. Based on the tests executed according to CEC standards (California Energy Commission), the energy necessary to keep water at the temperature of 39° c decreases impressively.

### Lighting the way

Add to your relaxation with mood changing interior lighting. The simple LEDs offer various colours that soothe your mind as worries disappear.

Sit in a J400 hot tub and you'll feel extra special in minutes. These are hot tubs that will look after you and your body, treating you with a relaxing massage in the warmth. Impress your friends and invite them to try out your Jacuzzi® experience – there is no other hot tub experience like it!

J400 premium

## Space for entertainment

All J400 series hot tubs are equipped with J-1000 LED screen control system. Simple and intuitive, it supports the exclusive BLUEWAVE™ Spa Stereo System which has a 10 metre Bluetooth connection, allowing you to manage your own playlists on your iPhone and iPod directly from the hot tub's display. In addition, it is provided with USB port, MP3 stereo and FM radio for you to immerse yourself fully in wellness, nurtured by your favourite music.

All functions can be operated and adjusted via the J-1000 control system with its illuminated LED panel. With a simple touch of your finger, you have complete control over the temperature and jets and you can store your favourite settings. You can also activate the “Eco Mode” function which allows you to control your energy consumption based upon frequency of use. You can also lock your settings.

## The best hydromassage.

The Jacuzzi® PowerPro® System drives all of the jet action, soft or strong, with low-pressure, high volume pumps. Different muscle groups demand different types of massaging jet action. Each of the versatile jets in the J-400 range offers a full range of massages, from robust and stimulating to gentle and rejuvenating. Selected adjustable jets let you control the way they perform just by turning their jets individually to suit you.

**Conserving energy**

SmartSeal™ is available on all J-400 hot tubs. Made from recycled blue jeans, this environmentally friendly solution achieves up to 20% reduction in energy use and protects from moisture, mold and reduced noise.

**Beautiful Watercolour™ Waterfalls**

The graceful raised profile design creates a dramatic cascade of water. Sit under the Watercolour™ waterfall and enjoy a soothing neck and shoulder massage.

**Simple and immediate maintenance**

The ProClarity™ system works together with the recirculation pump to achieve a high performance filtering system. The Logo Indicator Light intuitively displays any anomalies in the tank operation: white light - normal operation, red light - maintenance activity required.

**Wrapped in a special shell**

Jacuzzi® has created the special Trifusion™ shell, that is a tri-layer acrylic, vinylester vapour barrier and resin composite combined together, making the hot tub shell the strongest in the industry. A solution that guarantees both energy saving and solidity of structure.

You can see the Jacuzzi® difference a mile away. But get in and feel it, you'll be amazed at how wonderful you'll feel afterwards. Go on, let go and enjoy the benefits of a true Jacuzzi® hot tub hydromassage. The JLXL delivers a wonderful massage tailored to your needs; divert the jets to your liking, control the pressure, the power is at your fingertips.

**Symmetrical design**

The new flat surface top deck eliminates exposed acrylic for a clean, contemporary look. Stainless steel adds a crisp accent to the cabinet corners and the improved materials resist weather and UV damage.

**All under control.**

Intuitive controls housed in a discreet and streamlined panel, makes it easier than ever to customise your whole Jacuzzi® hot tub experience

### Space for entertainment

The J-LXL hot tub offers the exclusive BLUEWAVE™ Spa Stereo System which has a 10 metre Bluetooth connection, allowing you to manage your own playlists on your iPhone and iPod directly from the hot tub's display. In addition, it is provided with USB port, MP3 stereo and FM radio for you to immerse yourself fully in wellness, nurtured by your favourite music.

### Bright bubbles

The system of internal and perimeter LED lighting, offers an elegant and relaxing effect. Your hydrotherapy massage can continue long after the sun has gone down. The slimline waterfall coordinates spectacularly, illuminating the water just for you.

### ClearRay™ clear water

Manage your hot tub water easily and quickly. All Jacuzzi® Premium hot tubs are fitted with ClearRay™ UV technology meaning 100% of your hot tub water passes through UV rays and filters all the time. Relax and enjoy your massage.

### High density insulation

The inside of our J-LXL is packed with 1.5" of high density lining, with heat retaining backing. This, in conjunction with our Trifusion™ layer and foam insulation, means this is the most energy efficient hot tub in its class. All Jacuzzi® hot tubs meet strict energy consumption standards.

Smile inside, knowing that warming constant in your life is sat waiting patiently for you in your garden. Come home after a long day at work or a tough workout and take yourself off to a luxury destination of your choice, without leaving your home. Now you really can holiday at home.

J300 premium

# J300

NEW

premium

### **A completely renewed Premium series**

Major renewals and improvements in the J300 collection. The line boasts a more modern and functional design and new jets across all models which enhance and improve the performance of the hydro-massage. The aesthetics are charmingly enhanced thanks to new colours, while the controls become even simpler and more straightforward to manage thanks to a new control system.

### **The new Power Pro® Therapy Seats**

It is hard to improve upon perfection, but Jacuzzi® has managed it with the new seats of the J300 hot tubs. Thanks to the positioning and power of the jets, they offer an even more effective hydro-massage at the key nerve centres of the back and lumbar region. As well as enhancing its performance, Jacuzzi® has positioned a higher number of jets, especially in the lounge seats: from the neck to the shoulders, legs and feet, every area of the body is stimulated and massaged in-depth by a rotating and targeted jet which relieves tension, generating wellness.

### New Premium Design

The aesthetics of all J300 models have been lightened, refreshed and projected to a dimension of modernity. From the cutting-edge aesthetics of the filtering grid, to the filter shell, to the luminous and comfortable headrests, to the cover of the waterfall jet, every detail enhances the linearity and cleanliness of the lines.

### New control panel

All J300 hot tubs have a new control system with LED touch-screen display. The renewed aesthetics and cutting-edge technology make it a fully-fledged design icon consistent with the new philosophy of the line. Even simpler and more intuitive, all its functions can be activated with a simple touch of your finger, including the ClearRay Jacuzzi® cleaning system and the exclusive BLUEWAVE™ Spa Stereo System.

### Space for entertainment

All J300 series hot tubs support a new generation audio system: BLUEWAVE™ Spa Stereo System has a 10 metre Bluetooth connection, allowing you to manage your own playlists on your iPhone and iPod directly from the hot tub's display. In addition, it is provided with USB port, MP3 stereo and FM radio for you to immerse yourself fully in wellness, nurtured by your favourite music.

### Coating and shell

In addition to 3 layer insulation, we have also added SmartSeal™. Ideal for cold climates, this system also reduces noise and prevents the formation of mould and moisture. With SmartSeal™ you can save approximately 25% on your bills.

Beautiful and elegant, the Professional range is suitable for a wide range of commercial applications including holiday homes, wellness centres, golf clubs and small leisure clubs. Different to a domestic hot tub, installation is in-ground and involves installing a separate spa pack and compensation tank to allow water to continuously move through a quartz sand filter where it is cleaned before flowing back into the tub.

# professional

# professional

## **Professional immersion.**

Since the water level reaches the physical rim of the hot tub, you can be sure of deep immersion in your favorite Jacuzzi® hot tub massage seat. No more cold shoulders!

## **Professional massage.**

The jets included in a Professional hot tub are strategically placed for maximum hydromassage. They are all adjustable and differ in pressure and performance. The stainless steel covers add to the character and the blowers provide a continual champagne effect.

**Professional clean water.**

The quartz sand filter provides superior filtration ideal for more frequent use. Filtered water flows back into the tub through the ground drainage point. This creates an underwater fountain effect from the bottom of the hot tub, but also means that particles are collected by the jets more effectively and directed back through the overflow to the filter constantly.

**Professional quiet time.**

A wonderful benefit of using a Professional hot tub is that it is much quieter to run, as the working parts and the filtration processes can be positioned far from the hot tub. They can be separated to the hot tub by up to 6 meters. This allows you to enjoy your hydromassage to the fullest.

**Professional recycled water.**

A distinctive feature of the Professional range, is the 15° angled overflow grid around the surface of the hot tub. It 'collects' surface water, which overflows through the grid to a storage tank and filter. The cleaned water is then pumped back into the base of the hot tub and reused.

**Professional colour.**

There are underwater LED spotlights that illuminates the whole hot tub during your massage. Watch the colours change as your body relaxes.

# Spa-Pack

The Experience hot tubs baths are also distinguished by the very low noise level of the system. The Jacuzzi® technicians have in fact designed the set of pumps, the water heating system consisting of the electric heater and of the heat-exchangers, the compressors for the blowers and an optional ionizer (indispensable to further increase water quality) in an independent technical compartment (Spa pack) that can be positioned at a distance of up to 6 metres.

Thanks to superior quality filtering, the quartz sand filter makes the Experience hot tubs ideal for professional use. The filtered water flows back to the hot tub through the ground drainage point: this method, as well as offering the visual effect of an “underwater fountain”, sends the particles deposited at the bottom of the hot tub into circulation making them more likely to be captured by the jets that send the water to the filter. Although it is technically complex, the system is easy to manage even by home users by means of pneumatically controlled buttons.

## Spa and piping system

## ProEndure™ Premium steps

Your safety is our highest priority, so we always recommend accessorising your new hot tub with a set of steps. Our ProEndure™ collection of steps offers practical solutions for you to entertain and socialise around your hot tub safely. They are manufactured in synthetic materials which ensure their longevity and easy maintenance. They are also built using the same materials as the Premium hot tubs, coordinating nicely and making your garden neat and inviting.

Measures:

Step – 76 cm

Large step – 81 cm

Colours:

Brazilian Teak

Roasted Chestnut

Silver Wood

**ProStep™ JLX steps**

The ProStep™ complements our J-LXL hot tub perfectly. They have a lockable accessory compartment for added convenience and include a hand rail for easy entry and exit. These steps are only available in Brazilian Teak or Roasted Chestnut finish.

# Covers and energy saving

These elements not only provide practical energy saving, but also protect the shell of your hot tub and maintain your required temperature of the water.

Jacuzzi® hot tub covers protect your hot tub when it's not in use and also work effectively to maintain heat. The insulation inside our covers not only ensures that your hot tub saves energy, it also helps protect the water from contamination, keeping it clean and safe. Your Jacuzzi® hot tub cover adds an extra measure of security.

## Heaters

Our energy-saving heat exchangers heat your fresh hot tub water quickly, bringing it to the desired temperature more efficiently.

## Insulation

The different insulation methods inside our hot tub cabinets offer the best thermal retention. From high density, water resistant panels, SmartSeal™ insulating wrap of our Premium range to our Winter Pro kit on the Italian Design range, you can be sure that your new hot tub will keep your water warm and inviting for when you need it most and also during the cold season. It'll also do it more efficiently and effectively than you expect.

Based on the CEC tests on our Winter Pro Kit, the results in terms of energy efficiency are remarkable.

# Cover lifters

Exclusively for Premium series

Remove your hot tub cover with ease. The Covermate I has only one moving part and a built-in stop mechanism allowing installation to be quick and easy. It is a manual lift, which is ideal for hot tubs in gazebos or where space is limited. The Covermate III combines gas shock mechanisms which make opening covers effortless. The large aluminium mounting brackets, tubing and full bar construction provide superior strength. Ask which cover lifter will suit your Jacuzzi® hot tub.

# Cleaning and Maintenance

## **All the products you need to keep your hot tub water pristine clean**

It is really important for your hot tub water to be always clean and clear without substances and/or micro-organisms that may make it unsuitable for bathing.

### **For crystal-clear, pure water it is important to:**

- **filter it** (this is carried out by the combined action of the pump and filter) to eliminate macroscopic particles that enter the hot tub from the surrounding environment and/or from the users. Some models are provided with paper cartridge filters while in others the filter is in quartz sand;
- **disinfect it** using specific disinfectants that prevent the proliferation of algae and/or bacteria.

**Jacuzzi® has created a complete range of water treatment and hot tub cleaning products.**

Jacuzzi® Oxygen Starter Kit

To maintain and treat the wooden parts of our Italian Design range, you should use ActionWood, our water resistant wood treatment.

# After sales service

We are proud to work with so many Jacuzzi® authorised retailers worldwide and it is great that the number of Jacuzzi® retailers continues to grow. Your local Jacuzzi® authorised retailer will be able to help you with all your questions and enquiries regarding installation, delivery, water maintenance and any technical information you require. They may also offer credit services to help you pay for your new investment. We are available, with our retailers to help you with any questions or issues you may have. Our team of qualified engineers will visit your hot tub to repair it or service it as you require, just contact your retailer for more information. You can relax, you've got a Jacuzzi® hot tub and that means you're in safe hands.
